Charging the Battery

When you first get your new phone you’ll need to charge the battery. If the battery is low, there will be a pop-up message on the screen. As you charge your phone, the screen will tell you the exact battery level each time you wake it up.

**WARNING!** Use only ZTE-approved chargers and cables. The use of unapproved accessories could damage your phone or cause the battery to explode.

**CAUTION:** Do not remove or change the built-in rechargeable battery in your phone by yourself. The battery can only be changed by ZTE or a ZTE authorized service provider.

1. Connect the adapter to the charging port. Ensure that the adapter is inserted with the correct orientation. Do not force the connector into the charging port.
2. Connect the charger to a standard AC wall outlet. If the phone is on, you’ll see a charging icon, such as or , appear in the Status Bar.
3. Disconnect the charger when the battery is fully charged.

**NOTE:** If the battery is extremely low, you may be unable to power on the phone even when it is being charged. In this case, try again after charging the phone.

Installing a microSDHC Card

You have the option to install a microSDHC card of up to 32GB to expand your phone’s storage capacity. The microSDHC card can be installed and removed while the phone is turned on. Unmount the microSDHC card before removing it.

1. Insert the tray eject tool (or end of a paper clip) into the hole on the microSDHC card tray and pull the tray out.
2. Place a microSDHC card (not included) in the tray with the gold-colored contacts facing down.

**NOTE:** Some applications may require a microSDHC card to work normally or may store certain data on it. Therefore, it is recommended that you keep a microSDHC card installed and not remove or replace it randomly.
3. Carefully slide the tray back in place.

2. Connect the charger to a standard AC wall outlet. If the phone is on, you’ll see a charging icon, such as or , appear in the Status Bar.
3. Disconnect the charger when the battery is fully charged.

**NOTE:** Some applications may require a microSDHC card to work normally or may store certain data on it. Therefore, it is recommended that you keep a microSDHC card installed and not remove or replace it randomly.
3. Carefully slide the tray back in place.
Getting Started

for at least 10 minutes. Contact customer service if you still cannot power on the phone after prolonged charging.

Extending the Battery Life
Active applications, screen brightness levels, Bluetooth and Wi-Fi usage, and GPS functionality can drain your battery. You can follow the helpful tips below to conserve your battery power:

• Reduce the screen backlight time.
• Lower the screen brightness.
• Turn auto-sync, Wi-Fi, and Bluetooth off when not in use.
• Disable the GPS function when not in use. Most applications using this function will periodically query the GPS satellites for your current location; each query drains your battery.

Powering Your Phone On/Off

• Press and hold the Power/Lock Key to turn on your phone.
• To turn it off, press and hold the Power/Lock Key to open the options menu. Tap Power off and then tap OK.

Restarting Your Phone
If the screen freezes or takes too long to respond, try pressing and holding the Power/Lock Key for about 10 seconds to restart the phone.

Setting Up Your Phone for the First Time

When you first power on your phone after you purchase it or reset it to factory settings (see Settings – Personal – Backup and Reset), you may need to set it up before using it.

1. Tap the language field, select the language you want, and tap Start.
2. Connect to a Wi-Fi network and tap Next.
3. Set the date, time, and time zone, or use date and time data provided by the network. Then tap Next.
4. If you have a Google™ account, tap Existing to sign in. Tap New to create a Google account or tap Not now to set up an account later.
5. Configure the Google location options and tap Next.
6. Enter your name, which the phone uses to personalize some apps, and then tap OK.
7. You will be prompted to accept the Google terms of service. Tap Next to continue.
8. Tap Finish to complete the setup.

To lock the screen and keys:
To quickly turn the screen off and lock the keys, press the Power/Lock Key.

NOTE: To save battery power, the phone automatically turns off the screen after a certain period of time when you leave it idle. You will still be able to receive messages and calls while the phone screen is off.

To unlock the screen and keys:
1. Press the Power/Lock Key to turn the screen on.
2. Press and hold a blank area of the screen or tap and hold an application shortcut at the bottom of the screen to unlock the screen and open the application quickly.

NOTE: If you have set face unlock, an unlock pattern, PIN, or password for your phone (see Personalizing – Protecting Your Phone With Screen Locks), you’ll be prompted to look at the front camera, draw the pattern, or enter the PIN/password to unlock your phone.

Using the Touch Screen

Your phone’s touch screen lets you control actions through a variety of touch gestures.

• Tap – When you want to type using the on-screen keyboard, select on-screen items (such as application and settings icons), or press on-screen buttons, simply tap them with your finger.
• Tap and Hold – To open the available options for an item (for example, a message or link in a web page), tap and hold the item.

• Swipe or Slide – To swipe or slide means to quickly drag your finger vertically or horizontally across the screen.
• Drag – To drag, press and hold your finger with some pressure before you start to move your finger. While dragging, do not release your finger until you have reached the target position.
• Pinch – In some apps (such as Maps, Browser, and Gallery), you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).

NOTE: The Auto-rotate screen check box needs to be selected for the screen orientation to automatically change. Press the Home Key > Apps icon > Settings > Display > Auto-rotate screen.
You can also access the screen rotation control by sliding down the status bar and tap > ROTATION LOCKED/AUTO ROTATE.
### Getting Started

#### Getting to Know Your Phone

- **Power/Lock Key**: Press and hold to turn Airplane mode on or off, restart, enable silent mode/vibration mode/sound, or to power off. Press to change your phone to Sleep mode. Press to wake up your phone.
- **Home Key**: Press to return to the home screen from any application or screen. Press and hold to access Google Now.
- **Recent Apps Key**: Press to see recently used applications.
- **Back Key**: Press to go to the previous screen.
- **Volume Up/Down Key**: Press or hold to turn the volume up or down.

### Key Functions

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power/Lock Key</td>
<td>Press and hold to turn Airplane mode on or off, restart, enable silent mode/vibration mode/sound, or to power off. Press to change your phone to Sleep mode. Press to wake up your phone.</td>
</tr>
<tr>
<td>Home Key</td>
<td>Press to return to the home screen from any application or screen. Press and hold to access Google Now.</td>
</tr>
<tr>
<td>Recent Apps Key</td>
<td>Press to see recently used applications.</td>
</tr>
<tr>
<td>Back Key</td>
<td>Press to go to the previous screen.</td>
</tr>
<tr>
<td>Volume Up/Down Key</td>
<td>Press or hold to turn the volume up or down.</td>
</tr>
</tbody>
</table>
Changing the System Language
1. Press the Home Key > Apps icon > Settings > Language & input > language.
2. Select the language you need.

Setting the Date and Time
1. Press the Home Key > Apps icon > Settings > Date & time.
2. Uncheck Automatic date & time and Automatic time zone if you want to set the date, time, and time zone by yourself.
3. Set the date, time, time zone, and date/time format.

Changing the Ringtone and Notification Sound
You can customize the default ringtone for incoming calls and the default notification sound quickly.
1. Press the Home Key > Apps icon > Settings > Sound.
2. Tap Phone ringtone or Default notification.
3. Scroll through the list and select the ringtone you’d like to use.
4. Tap OK.

NOTE: See People – Editing Contacts – Setting a Ringtone for a Contact for how to assign a special ringtone to an individual contact.

Turning Touch Sounds On/Off
1. Press the Home Key > Apps icon > Settings > Sound.
2. Check or uncheck Dial pad touch tones, Touch sounds, Screen lock sounds, or Vibrate on touch, or set the emergency tone.

Adjusting Volumes
1. Press the Home Key > Apps icon > Settings > Sound > Volumes.
2. Drag the sliders to adjust the volume for each type of audio.
3. Tap OK to save.

NOTE: You can adjust the media volume when a media application is in use by pressing the Volume Up/Down Key. If no media application is active, press the Volume Up/Down Key to adjust ringtone volume (or the earpiece volume during a call).

Switching to Silent Mode
You can set the phone to silent mode by using one of the following methods:
• Press and hold the Power/Lock Key and then tap to enable silent mode, tap to enable silent mode with vibration, or tap to disable silent mode.
• Keep pressing the Volume Down Key when no media application is active. When the icon appears in the Status Bar, the phone is set to silent.
### Personalizing

mode with vibration. When the \( \text{Vibration} \) icon appears in the Status Bar, the phone is in silent mode.

- Press the Home Key > Apps icon > Settings > Sound > Silent mode, and tap Off, Vibrate, or Mute.

### Applying New Wallpapers

You can set the wallpaper for the home screen or lock screen.

1. Tap and hold any blank area of a home screen.
2. Tap Wallpaper.
3. Select a wallpaper source from Gallery, Wallpapers, Live Wallpapers, or Photos, and choose the image or animation you want to use as the wallpaper.
4. For Gallery images, tap OK at the top of the screen. For Live or Wallpapers, tap Set wallpaper. For Photos, tap SET WALLPAPER.

### Protecting Your Phone With Screen Locks

You can protect your phone by creating a screen lock.

1. Press the Home Key > Apps icon > Settings > Security.
2. Tap Screen lock.
3. Tap None, Long press, Face Unlock, Pattern, PIN, or Password.
   - Tap None to disable screen lock protection.
   - Tap Long press to enable screen lock and allow unlocking with a “tap and hold” gesture. You can unlock the screen by tapping and holding a blank area on the lock screen.
   - Tap Face Unlock to let the phone capture your face. You can unlock the screen by looking at the front camera. You also need to set a pattern or PIN in case the phone cannot recognize your face.

### Changing the Screen Brightness

1. Press the Home Key > Apps icon > Settings > Display > Brightness.

2. Tap AUTO to make the phone adjust the screen brightness automatically, or drag the slider to adjust the brightness manually.

### Personalizing

NOTE: You can turn on or off automatic adjustment without going to the Settings menu. Just swipe down the status bar at the top of the screen, tap \( \text{Brightness} \) > BRIGHTNESS. See Knowing the Basics — Using Quick Settings for more information.

### Encryption

You can encrypt all the data on your phone: Google accounts, application data, music and other media, downloaded information, and more. If you do, you must enter a numeric PIN or password each time you power on your phone.

**WARNING!** Encryption is irreversible. The only way to revert to an unencrypted phone is to perform a factory data reset, which erases all your data.

**Encryption Process**

1. Press the Home Key > Apps icon > Settings > Security > Encrypt phone.
2. Read the information about encryption carefully. The Encrypt phone button is dimmed if your battery is not charged or your phone is not plugged in. If you change your mind about encrypting your phone, press the Back Key.
3. Tap Encrypt phone.
4. Enter your lock screen PIN or password and tap Next.
5. Tap Encrypt phone again.

The encryption process starts and displays its progress. Encryption can take an hour or more, during which time your phone may restart several times.

**Before turning on encryption, prepare as follows:**

- Set a lock screen PIN or password.
- Charge the battery.
- Keep the phone connected to the charger.
- Schedule an hour or more for the encryption process. You must not interrupt it or you will lose some or all of your data.

### When you're ready to turn on encryption:

1. Press the Home Key > Apps icon > Settings > Security > Encrypt phone.
2. Read the information about encryption carefully. The Encrypt phone button is dimmed if your battery is not charged or your phone is not plugged in. If you change your mind about encrypting your phone, press the Back Key.

**WARNING!** If you interrupt the encryption process, you will lose data.

3. Tap Encrypt phone.
4. Enter your lock screen PIN or password and tap Next.
5. Tap Encrypt phone again.

The encryption process starts and displays its progress. Encryption can take an hour or more, during which time your phone may restart several times.
Personalizing

When encryption is complete, you’ll be prompted to enter your PIN or password. Subsequently, you must enter your PIN or password each time you power on your phone to decrypt it.

Knowing the Basics

Monitoring the Phone Status

The Status Bar at the top of the home screen provides phone and service status icons on the right side. Below are some of the icons you may see.

<table>

Indicators and Icons

Opening/Closing the Notification Panel
Notifications report the arrival of new messages, calendar events, and alarms, as well as ongoing events. You can open the Notification Panel to view the details of notifications.

- To open the Notification Panel, swipe your finger down from the top of the screen.
- To close the Notification Panel, swipe your finger up from the bottom of the screen or press the Back Key.

Responding to or Removing a Notification
In the Notification Panel, you can respond to a notification or remove the notifications. The Notification Panel also supports expandable notifications that let you perform additional actions right from the notification itself.

- To respond to a notification, tap it.
- To remove a notification, swipe it left or right.
- To remove all notifications, tap in the top right corner.

NOTE: If you turn off notifications for an app, you may miss its important alerts and updates. The notifications of some apps cannot be turned off.

Using Quick Settings
The Quick Settings in the notification panel make it convenient to view or change the most common settings for your phone.

In the Notification Panel, tap at the top of the notifications list to get to the quick settings menu.

- OWNER: Tap to add your personal information.
- BRIGHTNESS: Tap to adjust the screen brightness.
- SETTINGS: Tap to go to the settings menu.
- WI-FI: Tap to turn on or off Wi-Fi.
- DATA: Tap to enable or disable data access over the mobile network.
- AUTO ROTATE: Tap to turn on or off the Auto-rotate feature.
- BATTERY: Tap to see the battery information.
- AIRPLANE MODE: Tap to turn on or off the airplane mode.
- BLUETOOTH: Tap to turn on or off Bluetooth.
- LOCATION: Tap to turn on or off the GPS function.
- SOUND: Tap to switch between vibration and sound.
- SYNC: Tap to turn on or off account synchronization.
- FLASHLIGHT: Tap to turn on or off the flashlight.
Managing Apps and Widgets

Adding Apps and Widgets
1. Tap and hold an empty place on the home screen, and then tap Widgets or Apps.
2. Tap and hold an item and drag it to a home screen thumbnail at the bottom of the screen.

Moving Apps or Widgets
1. Tap and hold a widget or app on the home screen.
2. Drag it to the place you need.

Removing Apps or Widgets
1. Tap and hold a widget or app on the home screen.
2. Drag it to remove it.

Adjusting Widget Size
1. Tap and hold a widget on the home screen.
2. An outline appears around the widget. Drag the outline to resize the widget.

NOTE: Not all widgets can be resized.

Organizing With Folders
You can create folders on the home screen and add several apps in a folder.
You can move or remove folders the same way as moving or removing apps.
1. Tap and hold the app on the home screen you want to add into a folder until Folder appears.
2. Drag the app to Folder and release it. A new folder will be created and the app is added into the folder.
3. To add more apps into the folder, tap and hold each app and drag it over the folder before releasing it.
You can also open the folder, tap and check the apps you want to add into the folder, and then tap DONE.

NOTE: Tap the folder and then tap the name field to rename the folder.

Application List Screen
Press the Home Key > Apps icon to open the application list screen and find all your apps on the phone. You can uninstall or disable the apps, hide the apps or organize them into folders.

Organizing Application Icons With a Folder
1. Press the Home Key > Apps icon to open the application list screen.
2. Tap and hold an app and drag it into a folder on the top of the screen.

Setting the Home Screen Transition Effect
1. Tap and hold any blank area of a home screen.
2. Tap Effect.
3. Select an effect.

Uninstalling or Disabling an Application
1. Press the Home Key > Apps icon to open the application list screen.
2. Tap and hold an app and then release it.
3. Tap to uninstall the app or tap to disable it.

NOTE: To find the disabled applications, press the Home Key > Apps icon > Settings > Apps > DISABLED. You can then tap an application and tap Enable to enable it.
Not all applications can be uninstalled or disabled.

Rearranging the Primary Shortcuts
The home screen includes a customizable primary shortcuts area at the bottom of all home screens. You can drag apps, folders, and other priority items in or out of the area for instant access from any home screen.

Entering Text
You can enter text using the on-screen keyboard. Some apps open it automatically. In others, you open it by tapping where you want to type. You can press the Back Key to hide the on-screen keyboard. You can also enter text by speaking with the Google voice typing feature.

Changing Input Methods
1. When you use the on-screen keyboard to enter text, icon appears on the status bar.
2. Swipe down on the notification panel and tap Choose input method.
3. Select the input method you need.

NOTE: The icon appears only when more than one input method is installed.
Google Keyboard
The Google keyboard provides a layout similar to a desktop computer keyboard. Turn the phone sideways and the keyboard will change from portrait to landscape. The landscape keyboard is not supported in all applications.

• Tap the alphabetic keys to enter letters. Tap and hold some specific keys to enter associated accented letters or numbers. For example, to enter è, tap and hold and the available accented letters and number 3 appear. Then slide to choose è.
• Tap to use uppercase. Double-tap to lock uppercase. This key also changes to indicate the current case you are using: for lowercase, for uppercase, and when locked in uppercase.
• Tap to delete the text before the cursor.
• Tap to select numbers and symbols. You can then tap to find more.
• Tap to enter miniature icons.
• Tap and hold to change the input languages or set up the Google keyboard.

Google Voice Typing
Google voice typing uses the Google voice recognition service to convert speech to text.
1. Tap to access the voice typing when you are using the Google keyboard.
2. When you see the microphone image, speak what you want to type.
3. You can continue entering text to keep it or to delete it.

NOTE: Say “comma,” “period,” “question mark,” “exclamation mark,” or “exclamation point” to enter punctuation.

Input Method Settings
Choose the input method settings by pressing the Home Key > Apps icon > Settings > Language & input. In the KEYBOARD & INPUT METHODS section, you can set the default input method and choose the settings for input methods.

Editing Text
• Move the insertion point: Tap where you want to type. The cursor blinks in the new position, and a tab appears below it. Drag the tab to move the cursor.
• Select text: Tap and hold or double tap within the text. The nearest word highlights, with a tab at each end of the selection. Drag the tabs to change the selection.
• Cut or copy: Select the text you want to manipulate. Then tap or to cut or copy the text to the clipboard.
• Replace text with the clipboard text: Select the text you want to replace. Then tap or PASTE.
• Insert text from the clipboard: Move the cursor to the insertion point and then tap and hold the tab below the cursor. Release your finger and tap PASTE.

Opening and Switching Apps

Opening an App
1. Press the Home Key > Apps icon.
2. Slide left or right on the screen and tap an app to open it.

Switching Between Recently Opened Apps
1. Tap the Recent Apps Key. A list of the names and thumbnails of apps you’ve recently used opens. If you’ve been using more apps recently than can fit on the screen, you can scroll the list up and down.
2. Tap a thumbnail to open that app.

NOTE: You can swipe a thumbnail sideways to remove it from the list.
Connecting to Networks and Devices

Connecting to Mobile Networks

Controlling Mobile Data Use
To enable or disable data access:
1. Press the Home Key > Apps icon > Settings > Mobile networks.
2. Check Data enabled to enable data access over the mobile network. Clear the check box to disable data access.

To enable always-on data access:
1. Press the Home Key > Apps icon > Settings > Mobile networks.
2. Check Always-on mobile data to allow applications to update data automatically.

NOTE: When you enable this option, more data traffic will be generated for automatic updates of applications data, and your phone will consume more power.

To get data services when roaming:
1. Press the Home Key > Apps icon > Settings > Mobile networks.
2. Check Data roaming.

NOTE: Data roaming may incur significant roaming charges.

Setting Access Point Names
To connect to the Internet you can use the default Access Point Names (APN).

1. Press the Home Key > Apps icon > Settings > Mobile networks > Access Point Names.
2. If the default APN is not enabled, tap the APN to enable it.

NOTE: To set the APN to default, tap > Reset to default.

Connecting to Wi-Fi
Wi-Fi is a wireless networking technology that can provide Internet access at distances of up to 100 meters, depending on the Wi-Fi router and your surroundings.

Turning Wi-Fi On and Connecting to a Wi-Fi Network
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap the Wi-Fi network name and then tap Connect.

NOTE:
• Your phone automatically connects to previously used Wi-Fi networks when they are in range.
• To connect to a Wi-Fi router that supports WPS, tap WPS Pin Entry on the phone’s Wi-Fi menu and press the WPS button on your router.

Getting Notified of Open Networks
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap > Advanced.
4. Check Network notification.

When Wi-Fi is on, you receive notifications in the Status Bar when your phone detects an open Wi-Fi network. Uncheck the option to turn off notifications.

Adding a Wi-Fi Network
You can add a Wi-Fi network if the network does not broadcast its name (SSID) or add a Wi-Fi network when you are out of range.

To connect to a secured network, you first need to get the security details from the network’s administrator.

1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap the Wi-Fi network name and then tap Connect.

NOTE:
• Your phone automatically connects to previously used Wi-Fi networks when they are in range.
• To connect to a Wi-Fi router that supports WPS, tap WPS Pin Entry on the phone’s Wi-Fi menu and press the WPS button on your router.

Getting Notified of Open Networks
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap > Advanced.
4. Check Network notification.

When Wi-Fi is on, you receive notifications in the Status Bar when your phone detects an open Wi-Fi network. Uncheck the option to turn off notifications.

Adding a Wi-Fi Network
You can add a Wi-Fi network if the network does not broadcast its name (SSID) or add a Wi-Fi network when you are out of range.

To connect to a secured network, you first need to get the security details from the network’s administrator.

1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap the Wi-Fi network name and then tap Forget.

Connecting to a WPS Network
Wi-Fi Protected Setup (WPS) is a feature that makes it easy to add your phone to the access points which support WPS.

You can use one of the following methods to connect your phone to a wireless network using WPS.

Method one: WPS button (Recommended)
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap the WPS button on the wireless router and the access point will recognize your phone and add it to the network.

Method two: PIN
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Slide the Wi-Fi switch to the ON position.
3. Tap the WPS network name and then tap Forget.

Connecting to Networks and Devices
Connecting to Networks and Devices

4. The WPS PIN displays on the screen. Enter the PIN into the access point’s setup page.

After entering the PIN, your phone automatically finds the access point and configures the connection.

NOTE: For detailed information about the WPS feature of access point, please refer to its documentation.

Adjusting Advanced Wi-Fi Settings
1. Press the Home Key > Apps icon > Settings > Wi-Fi.
2. Tap Advanced > Wi-Fi. Swipe down on the Status Bar and tap Settings > Wi-Fi.

Connecting to Bluetooth Devices
Bluetooth is a short-range wireless communication technology. Phones or other devices with Bluetooth capabilities can exchange information wirelessly within a distance of about 32 feet (10 meters). The Bluetooth devices must be paired before the communication is performed.

Turning Bluetooth On/Off
1. Press the Home Key > Apps icon > Settings > Bluetooth.
2. Slide the Bluetooth switch to the ON or OFF position.

Making Your Phone Visible
In order to work with other phones or devices that have Bluetooth, you need to make your phone visible to them.
1. Press the Home Key > Apps icon > Settings > Bluetooth.
2. Slide the Bluetooth switch to the ON or OFF position.
3. Tap your device name on the top of the screen to make your phone visible or invisible.

NOTE: Tap Visibility timeout to set the Bluetooth visibility timeout of your phone.

Changing the Device Name
1. Press the Home Key > Apps icon > Settings > Bluetooth.
2. Slide the Bluetooth switch to the ON or OFF position if Bluetooth is off.
3. Tap Rename phone.
4. Edit the name and tap Rename.

Pairing With Another Bluetooth Device
1. Press the Home Key > Apps icon > Settings > Bluetooth.
2. Slide the Bluetooth switch to the ON or OFF position if Bluetooth is off.

Sending Data via Bluetooth
1. Open the appropriate application and select the file or item you want to share.
2. Select the option for sharing via Bluetooth. The method may vary by application and data type.
3. Tap a Bluetooth device the phone has paired with or wait for it to search for new devices and tap one of them.

Receiving Data via Bluetooth
1. Turn Bluetooth on before trying to receive data via Bluetooth.

Connection to Networks and Devices

Unpairing From a Bluetooth Device
You can make your phone forget its pairing connection with another Bluetooth device. To connect to the device again, you may need to enter or confirm a passkey.
1. Press the Home Key > Apps icon > Settings > Bluetooth and ensure that Bluetooth is turned on.
2. In the list of paired devices, tap beside the Bluetooth device you want to unpair.
3. Tap Unpair.

NOTE: If the phone has not been paired with the sending device, you may need to tap Bluetooth > Z936L in Settings to keep the phone detectable through Bluetooth.
2. Swipe down on the Status Bar and tap Accept to start receiving the data.
Connecting to Networks and Devices

Depending on your storage setting and whether a microSDHC card is installed, received files are stored automatically in a dedicated folder (Bluetooth, for instance). You can access them with the File Manager app.

Connecting to Your Computer via USB

You can connect your phone to a computer with a USB cable and transfer music, pictures, and other files in both directions. Your phone stores these files in internal storage or on a removable microSDHC card.

Connecting Your Phone to a Computer via USB

1. Connect your phone to the PC with a USB cable.
2. Open the Notification Panel and tap (Connected as...).
3. Choose one of the following options:
   - Charge only: Charge your phone via USB.
   - USB mass storage: Transfer files between your PC and the microSDHC card on your phone.
   - Install driver: Select this option when features (Connect to PC software, Media device) are enabled for the first time, or when they're unavailable.

   NOTE: You can also install the driver on the PC by running the executable file in the CD-ROM drive.

   • Media device (MTP): Transfer media files on Windows®, or using Android File Transfer on Mac®.
   - NOTE: For Windows XP, please install the drivers and Media Player 11 (or later version) when you use Media device (MTP) for the first time.
   - Camera (PTP): Transfer photos using camera software.
   - NOTE: To make your phone connect to the computer automatically using the selected connection type, check Don't ask me again.

Connecting with Windows Media Player

You can sync music with your phone and your computer installed with Windows Media Player.

1. Connect the phone with your computer via USB and choose Media device (MTP).
2. Open Windows Media Player and synchronize music files.

Disconnecting Your Phone From the Computer

To disconnect the phone from the computer, simply unplug the USB cable when you’re finished.

Removing the microSDHC Card From Your Phone

If you need to remove the microSDHC card while the phone is on, you should unmount it first.

1. Press the Home Key > Apps icon > Settings > Storage.
2. Scroll down and tap Unmount SD card > OK.
3. The icon appears in the Status Bar and you can now safely remove the microSDHC card from the phone.

   NOTE: If you unmount the microSDHC card, some apps that you are using will stop and may be unavailable until you remount the microSDHC card.

Erasing the microSDHC Card

1. Press the Home Key > Apps icon > Settings > Storage.
2. Scroll down the screen and tap Erase external SD card > Erase SD card > Erase everything.

   CAUTION! The formatting procedure erases all the data on the microSDHC card, after which the files CANNOT be retrieved.

Connecting to Virtual Private Networks

Virtual private networks (VPNs) allow you to connect to the resources inside a secured local network. VPNs are commonly deployed by corporations, schools, and other institutions to let people access local network resources when not on campus, or when connected to a wireless network.

Depending on the type of VPN you are using, you may be required to enter your login credentials or install security certificates before you can connect to your VPN. You can get this information from your network administrator.

NOTE: You need to set a lock screen pattern, PIN, or password before you using credential storage.

Adding a VPN

1. Press the Home Key > Apps icon > Settings > More... > VPN.
2. Tap ADD VPN PROFILE and fill in the information provided by your network administrator.
3. Tap Save.

The VPN is added to the list on the VPN screen.

Connecting to a VPN

1. Press the Home Key > Apps icon > Settings > More... > VPN.
2. Tap the VPN that you want to connect to.
3. When prompted, enter any requested credentials and then tap Connect.

   NOTE: You need to set a lock screen PIN or password before you can use credential storage.

3. When prompted, enter any requested credentials and then tap Connect.

When you are connected, the VPN connected icon appears in the Status Bar.

Modifying a VPN

1. Press the Home Key > Apps icon > Settings > More... > VPN.
2. Tap and hold the VPN that you want to modify.
3. Tap Edit profile and edit the VPN settings.
4. Tap Save.
You can place calls from the Phone app, the People app, or other apps or widgets that display contact information. Wherever you see a phone number, you can usually tap it to dial.

**Placing and Ending Calls**

**Placing a Call by Dialing**
1. Press the Home Key > > .
2. Enter the phone number or the contact name with the dialpad. The phone will display matching information from your contact list. Tap ✖ to delete incorrect digits.

**NOTE:** To make an international call, tap and hold the 0 Key to enter the plus (+) symbol. Next, enter the country code followed by the city/area code and then the phone number.
3. Tap the matching contact to call the contact or tap ✖ to call the number.

**NOTES:**
- You can also tap the search box at the top of the Phone app screen and enter the phone number or contact name you want to call. Tap the dialpad. The phone will display matching information from your contact list. Tap ✖ to delete incorrect digits.
- To silence the ringer before answering the call, press the Volume Up/Down Key.

**Answering or Rejecting Calls**

When you receive a phone call, the Incoming Call screen opens, displaying the Caller ID or the information about the caller that you’ve entered in People. You can answer or reject the call, or reject it with a text message.

**Answering a Call**
When you receive a phone call, slide ✖ down to answer the call.

**NOTE:** To silence the ringer before answering the call, press the Volume Up/Down Key.

**Rejecting a Call**
When you receive a phone call, slide ✖ up to reject the call.

You can also slide ✖ up to reject the call and send a preset text message to the caller.

**NOTE:** To edit the text response from within the Phone app, tap ➤ ➤ Settings ➤ Quick responses.

**Answering or Rejecting Calls**

When you receive a phone call, the Incoming Call screen opens, displaying the Caller ID or the information about the caller that you’ve entered in People. You can answer or reject the call, or reject it with a text message.

**Answering a Call**
When you receive a phone call, slide ✖ down to answer the call.

**NOTE:** To silence the ringer before answering the call, press the Volume Up/Down Key.

**Rejecting a Call**
When you receive a phone call, slide ✖ up to reject the call.

You can also slide ✖ up to reject the call and send a preset text message to the caller.

**NOTE:** To edit the text response from within the Phone app, tap ➤ ➤ Settings ➤ Quick responses.

**Working With the Call Log**

The Call Log is a list of all the calls you’ve placed, received, or missed. It provides a convenient way to redial a number, return a call, or add a number to your Contacts.

To open the call log, press the Home Key > > .

**Placing a Call from the Call Log**

1. Open the Call Log.
2. Tap a number for more information about the call, or tap ✖ beside it to call back.

**Adding a Call Log Number as a Contact**

1. Open the Call Log.
2. Tap a number to view more call information.
3. Tap ➤ .
4. To add the number to an existing contact, tap a contact in the list. To add a new contact, tap CREATE NEW CONTACT.

**Taking Other Actions on a Call Log Entry**

1. Open the Call Log.
2. Tap a number to view more call information. While viewing the call details, you can:
   - Tap the number to call it.
   - Tap ➤ ➤ Edit number before call to edit the number in the dialer before calling it.
   - Tap ➤ to send a message.
   - If the number belongs to a contact you already have, tap ➤ to view contact details.
3. Tap ➤ ➤ Remove from call log to delete the call log.

**Calling Your Contacts**

1. Press the Home Key > > .
2. Tap and hold the 1 Key in the dialer. If prompted, enter your voicemail password.
3. Follow the voice prompts to listen to and manage your voicemail messages.

**NOTE:** To set your voicemail service, tap ➤ ➤ Settings ➤ Voicemail in the dialer and tap the voicemail settings you want to change. For detailed information, please contact your service provider.

**Using Options During a Call**

During a call, you will see a number of on-screen options. Tap an option to select it.
- Tap ➤ to view all call options.
- Tap ➤ to switch to the keypad when you need to enter a code (for example, the PIN for your voicemail or bank account) during the call.
- Tap ➤ to mute or unmute the microphone.
- Tap ➤ to turn the speaker on or off.
- Tap ➤ to make another call separately from the first call, which is put on hold.
- Tap ➤ to go to your messaging inbox.
- Tap ➤ to go to contacts.

**Checking Voicemail**

If you have set the phone to divert certain calls to voicemail, callers can leave voicemail messages when they cannot reach you. Here’s how to check the messages they left.

1. Press the Home Key > > .
2. Tap and hold the 1 Key in the dialer. If prompted, enter your voicemail password.
3. Follow the voice prompts to listen to and manage your voicemail messages.

**NOTE:** To set your voicemail service, tap ➤ ➤ Settings ➤ Voicemail in the dialer and tap the voicemail settings you want to change. For detailed information, please contact your service provider.

**Using Options During a Call**

During a call, you will see a number of on-screen options. Tap an option to select it.
- Tap ➤ to view all call options.
- Tap ➤ to switch to the keypad when you need to enter a code (for example, the PIN for your voicemail or bank account) during the call.
- Tap ➤ to mute or unmute the microphone.
- Tap ➤ to turn the speaker on or off.
- Tap ➤ to make another call separately from the first call, which is put on hold.
- Tap ➤ to go to your messaging inbox.
- Tap ➤ to go to contacts.
Phone Calls

- Tap to merge the separate calls into a single conference call.
- Tap to put the caller you are speaking to on hold, and switch to the other call that has been put on hold.
- Tap to end the current call.

WARNING! Because of higher volume levels, do not place the phone near your ear during speakerphone use.

Managing Multi-party Calls
When the call waiting and three-way call features are available, you can switch between two calls or set up a conference call.

NOTE: The call waiting and three-way call features need network support and may result in additional charges. Please contact your service provider for more information.

Switching Between Current Calls
When you’re on a call, your phone screen informs you that another call is coming in and displays the caller ID.

To respond to an incoming call while you’re on a call:
Tap to answer the call. This puts the first caller on hold and answers the second call. Or tap to reject the second call.

NOTE: Tap to reject the second call and select a preset text message or edit one to send to the caller.

To switch between two calls:
Tap .

Setting Up a Conference Call
With this feature, you can talk to two people at the same time.
1. On the dialer screen, enter a number and tap .
2. Once you have established the connection, tap and dial the second number. This puts the first caller on hold and dials the second number.
3. When you’re connected to the second party, tap .
If one of the people you called hangs up during your call, you and the remaining caller stay connected. If you initiated the call and are the first to hang up, all callers are disconnected.
To end the conference call, tap .

Adjusting Your Call Settings
Press the Home Key > Apps icon > Settings > Call settings to configure the call options.

Phone Calls

Hearing aids
- Check this option to turn on hearing aid compatibility.

DTMF tones
- Set the length of dual-tone multi-frequency (DTMF) signal tones.

Speed dial
- Set speed dialing keys.

Call ended operation tips
- Check to use the tips.

Auto answer
- Set to answer incoming calls automatically. You can also set auto answer details, like Call duration and Auto answer conditions.

Call forwarding
- Forward your incoming calls to a different number. And choose when to forward: Always forward, Forward when busy, Forward when unanswered, or Cancel All Forward.

Additional settings
- Voice privacy: Check to enable enhanced privacy mode.
- Plus code dialing setting: Set plus code dialing number.

Accounts
- Set up Internet calling accounts.

Use Internet calling
- Set your Internet calling preference. For all calls when data network is available, Only for Internet calls, or Ask for each call.
You can add contacts on your phone and synchronize them with the contacts in your Google account or other accounts that support contact syncing.

To see your contacts, press the Home Key > . From there, you can tap the tabs to quickly switch to your contact groups or favorite contacts.

**Checking Contact Details**
1. Press the Home Key >.
2. Scroll through the list to view all your contacts.
3. Tap a contact to view its details.

**NOTE:** If you have a lot of contacts stored, you’ll see a slider on the right side of the screen. To go directly to a letter, tap and hold the slider and drag it to a letter.

**Importing, Exporting, and Sharing Contacts**
You can import/export contacts to/from your phone storage or microSDHC card. This is especially useful when you need to transfer contacts between different devices. You can also quickly share your contacts using Bluetooth, Email, Messages, etc.

### Importing Contacts From the micro-UIM Card
1. Press the Home Key >.
2. Tap > Import/Export > Manage SIM card contacts.
3. If you have added contact accounts other than the phone, select an account in which to save the contacts.
4. Tap a contact to import it, or tap > Import all to import all contacts in the micro-UIM card.

### Importing Contacts From the microSDHC Card or Phone Storage
1. Press the Home Key >.
2. Tap > Import/Export > Import from storage.
3. If you have added contact accounts other than the phone, select an account in which to save the contacts.
4. Select the vCard file(s) in the microSDHC card or the phone storage and tap OK.

**NOTE:** If the microSDHC card is not installed in the phone, you can import vCard file(s) from the phone storage.

### Exporting Contacts to the micro-UIM Card
1. Press the Home Key >.
2. Tap > Export to SIM card > OK.

**NOTE:** If the micro-UIM card is full, you cannot export contacts to the card.

### Exporting Contacts to the microSDHC Card or Phone Storage
1. Press the Home Key >.
2. Tap > Export to storage.
3. The phone will prompt you with the name of the vCard file. Tap OK to create the file.

**NOTE:** If the microSDHC card is not installed in the phone, you can export vCard file(s) into the phone storage.

### Sharing Contacts
1. Press the Home Key >.
2. Tap > Multi-Select.
3. Tap the contacts you want to share to select them and then tap .
4. Choose to share the contacts via Bluetooth, Drive, Email, Gmail, or Messaging.

## Working With Favorite Contacts
In the Favorite contacts tab, you can find your favorite contacts and frequently used contacts.

### Adding a Contact to Favorites
You can add the contacts used frequently to Favorites so you can find them quickly.
1. Press the Home Key >.
2. Tap > to add a new contact.

**NOTE:** If you have not added any contacts, tap Create a new contact.
3. Tap the account field to choose where to save the contact. If a sync account is selected, the contacts will be synced automatically with your account online.
4. Enter the contact name, phone numbers, email addresses, and other information.
5. Tap DONE to save the contact.

### Removing a Contact from Favorites
1. Press the Home Key >.
2. Tap > next to the contact name.
3. Tap to remove the contact from Favorites.

**NOTE:** If the microSDHC card is not installed in the phone, you can export vCard file(s) from the phone storage.

### People
Working With Groups

Viewing Your Contact Groups
1. Press the Home Key > 📞 > 📌.
2. Scroll through the list to view the preset groups and any groups you have created.
3. Tap a group to view its members.

Setting Up a New Group
1. Press the Home Key > 📞 > 📌.
2. Tap ☑️ to create a new group.
3. If you have added contact accounts other than the phone, tap to choose an account for the new group.
4. Enter a group name.
5. Tap Add member and select the contacts you wish to be the group members.
6. Tap ✅.
7. If necessary, tap Default below RINGTONE to set a special ringtone for incoming calls from the group members.
8. Tap DONE.

Deleting a Group
1. Press the Home Key > 📞 > 📌.
2. Tap a group and then tap ☑️ > Delete.
3. Tap OK to delete the group. The contacts in the group will not be deleted.

Editing a Group
1. Press the Home Key > 📞 > 📌.
2. Tap a group.
3. Tap ☑️ > Rename group to edit the group name.
Or tap ☑️ > Multi-Select to select the members you don’t need and remove them.

Searching for a Contact
1. Press the Home Key > 📞 > 📌, and then tap 📟 to search.
2. Input the contact name you want to search for. The contacts matched will be listed.

Editing Contacts

Editing Contact Details
1. Press the Home Key > 📞.
2. Tap a contact and then tap ☑️.
3. Edit the contact and tap DONE.

Setting a Ringtone for a Contact
Assign a special ringtone to a contact, so you know who is calling when you hear the ringtone.
1. Press the Home Key > 📞.
2. Tap a contact and then tap ☑️ > Set ringtone.
3. Select a ringtone you like and tap OK.

Deleting a Contact
1. Press the Home Key > 📞.
2. Tap a contact you want to delete and then tap ☑️ > Delete.
3. Tap OK to confirm.

Deleting Several Contacts
1. Press the Home Key > 📞.
2. Tap ☑️ > Multi-Select.
3. Tap to select the contacts you want to remove and then tap ☑️.
4. Tap OK to confirm.

Joining Contacts
As your phone synchronizes with multiple online accounts, you may see duplicate entries for the same contact. You can merge all the separate information of a contact into one entry in the contacts list.
1. Press the Home Key > 📞.
2. Tap a contact to display the contact’s details.
3. Tap Edit > ☑️ > Join.
4. Tap the contact whose information you want to join with the first entry.
5. Tap DONE.

The information from the second contact is added to the first contact, and the second contact is no longer displayed in the contacts list.
You can repeat these steps to join another contact to the main contact.

Separating Contact Information
If contact information from different sources was joined in error, you can separate the information back into individual contacts on your phone.
1. Press the Home Key > 📞.
2. Tap a contact you want to separate.
3. Tap Edit > ☑️ > Separate.
4. Tap OK to confirm.
Adding or Removing Accounts
You can add multiple Google accounts and Microsoft Exchange ActiveSync® accounts. You may also add other kinds of accounts, depending on the apps installed on your phone.

Adding an Account
1. Press the Home Key > Apps icon > Settings > Add account.
2. Tap the type of account you want to add.
3. Follow the on-screen steps to enter the information about the account. Most accounts require a username and password, but the details may vary. You may also need to obtain some information from IT support or your system administrator.
When the account is successfully added, it is displayed in the ACCOUNTS list.

Removing an Account
Removing an account will delete it and all information associated with it from your phone, such as emails and contacts.
1. Press the Home Key > Apps icon > Settings. In the ACCOUNTS section, tap the account category and then the account you want to sync.
2. Tap to Remove account > Remove account.

Configuring Account Sync
Configuring Auto Sync Setting
1. Press the Home Key > Apps icon > Settings > Data Usage.
2. Tap and check or uncheck Auto-sync data. When automatic sync is turned on, changes you make to information on your phone or on the web are automatically synced with each other.
When auto sync is turned off, you need to sync manually to collect emails, updates, or other recent information.

Syncing Manually
1. Press the Home Key > Apps icon > Settings.
2. In the ACCOUNTS section, tap the account category and then the account you want to sync.
3. Tap > Sync now.

Changing an Account’s Sync Settings
1. Press the Home Key > Apps icon > Settings.
2. In the ACCOUNTS section, tap the account category and then the account. The Sync settings screen appears, showing a list of information the account can sync.
3. Check or uncheck items as you need. Checked types of information on the phone and the web will be kept in sync when auto-sync is turned on.

Email
Press the Home Key > Apps icon > Email. Use it to read and send emails from services other than Gmail.

Setting Up the First Email Account
1. When you open Email for the first time, enter your email address and password.
2. Tap Next to let the phone retrieve the network parameters automatically.

NOTE: You can also enter these details manually by tapping Manual setup or if automatic setup fails.
3. Follow the on-screen instructions to finish setup. Your phone will show the inbox of the email account and start to download email messages.

Checking Your Emails
Your phone can automatically check for new emails at the interval you set when setting up the account. You can also check new emails manually by tapping at the bottom of the email list to download earlier messages.

Replying to or Forwarding an Email
1. Open the email you want to reply to or forward from the Inbox.
2. Choose one of the following:
- To reply to the sender, tap at the bottom of the screen.
- To reply to the sender and all recipients of the original message, tap at the bottom of the screen.
- To forward the message, tap at the bottom of the screen.
3. Edit your message and tap .

Marking an Email as Unread
You can return a read email to the unread state—for example, to remind yourself to read it again later. You can also mark a batch of emails as unread.
• While reading a message, tap > Mark as unread.
• While in a message list (for instance, the inbox), tap the checkboxes before the messages and then tap .

Deleting an Email
You can delete an email from its folder. You can also delete a batch of emails.
• While reading a message, tap > OK.
• While in a message list (for instance, the inbox), tap the checkboxes in front of the messages and then tap > OK.

Responding to an Email
You can reply to or forward a message that you receive. You can also delete messages and manage them in other ways.
Writing and Sending an Email

1. Open the Email app and tap 📧.

   NOTE: If you have more than one email account added on the phone, tap the sender line to select the account you want to use for sending the message.

2. Enter a contact name or email address in the To field. Separate each recipient with a comma. You can also tap 💼 to select recipients from your contacts.

   NOTE: Tap 📥 > Add Cc/Bcc to send a carbon copy or blind carbon copy to other recipients.

3. Enter the email subject and compose the email text.

4. Tap 📥 at the top of the screen to send the message.

Adding a Signature to Your Emails

You can set a few lines of plain text as a signature for every outgoing email message from an account, such as your name and contact information.

1. Open the Email app.

2. Tap 📥 > Settings and select the account you want to add a signature to.

3. Tap Signature and enter the text.

4. Tap OK.

Adding and Editing Email Accounts

Adding an Email Account

After setting up your first email account (see Email — Setting Up the First Email Account), you can add more email accounts and manage them separately.

1. Open the Email app.

2. Tap 📥 > Settings and tap ADD ACCOUNT at the top right of the screen.

3. Set up the account as you did with the first one.

Editing an Email Account

You can change a number of settings for an account, including how often you check for email, how you’re notified of new emails, and details about the servers the account uses to send and receive emails.

1. Open the Email app.

2. Tap 📥 > Settings and tap the account whose settings you want to change.

3. Make the changes you want and press the Back Key when you’re finished.

Removing an Email Account

1. Open the Email app.

2. Tap 📥 > Settings and tap the account you want to remove.

3. Tap Remove account > OK.

Changing General Email Settings

General settings apply to all email accounts you add.

1. Open the Email app.

2. Tap 📥 > Settings > General.

3. Make the changes you want and press the Back Key when you’re finished.
After you sign in to your Google account on the phone, you can send and retrieve Gmail messages with the Gmail app.

**NOTE:** This feature may not be available in certain regions or with certain service providers.

**Opening Your Gmail Inbox**
Press the Home Key > Google > Gmail. The Inbox screen appears.
If you haven’t signed in, you will be prompted to do so or create a new account.
Swipe down on the screen to refresh your inbox and download new messages.

**Switching Accounts**
Gmail displays conversations, messages, and settings from one Google account at a time. If you have signed in to more than one Google account on your phone, you can switch accounts and view information in each account.

1. From your Inbox, tap 
2. Tap your account name.
3. Tap the account you want to see. The account’s Inbox will open.

**Writing and Sending a Message**
1. Open your Gmail Inbox and switch to the account you want to use for sending the message.
2. Tap 📨 at the bottom of the screen.
3. Enter a contact name or email address in the To field. Separate each recipient with a comma.
4. Enter the email subject and compose the email text.
5. To attach an image, tap 📷.
6. Tap 📨 at the top of the screen to send the message.

**Adding a Signature to Your Gmail Messages**
You can set a few lines of plain text as a signature for every outgoing Gmail message. The signature you set on the phone is independent of the signature you use for Gmail on the web.

1. Open the Gmail app.
2. Tap 📟 > Settings and select the account you want to add a signature to.
3. Tap Signature and enter the text.
4. Tap OK.

**Replying to or Forwarding a Message**
1. Open the Gmail message you want to reply to or forward to another person.
2. Choose one of the following:
   - To reply to the sender, tap ✉️ in the message header.
   - To reply to the sender and all recipients of the original message, tap ✉️.

---

**Working With Received Attachments**
When a message has an attachment, Gmail displays information about it in the ATTACHMENTS section of the email.

**Working With Labels**
Message labels include both labels you create and default labels such as Sent, Starred, and Outbox. You can organize your emails by labeling them or adding stars to them. Labels also help you sort your messages, just like folders.

**Adding or Changing a Label**
1. Open the Gmail app and tap the sender images next to the messages you want to label.
2. Tap 📟 > Change labels.
3. Check or uncheck labels in the new screen and tap OK.

**Adding Stars to Messages**
1. Open the Gmail app and tap the sender images next to the messages you want to star.
2. Tap 🌟 > Add star.
3. To add a star to just one message, tap 🌟 beside the message.

**Viewing Messages by Label**
1. Open the Gmail app and tap 📟 at the top of the screen.
2. Tap a label below All labels to view messages with that label.

**Changing Gmail Settings**
Open the Gmail app and tap 📟 > Settings to change General settings, which apply to all Gmail accounts, or other settings that only apply to specific accounts.
You can use Messaging to exchange text messages (SMS) and multimedia messages (MMS).

Opening the Messaging Screen
Press the Home Key > .
The Messaging screen opens where you can create a new message, search for messages, or open an ongoing message thread.
- Tap ≧ to write a new text or multimedia message.
- Tap ≦ to search for a message using keywords.
- Tap an existing message thread to open the conversation.

Sending a Text Message
2. Add recipients in one of the following ways:
   - Tap the To field and manually enter the recipient’s number or the contact name. If the phone presents a few suggestions, tap the one you want to add.
   - Select recipients from your contacts by tapping ≦.
3. Tap the Type message field and enter the content of your text message.
4. If you want to send a multimedia message, tap ≧ to attach a file or a slideshow to the message.
5. Tap ≧.

NOTES:
- You can also include email addresses as recipients for multimedia messages.
- Do not add any attachment if you want to send a text message. Otherwise you may be charged for a multimedia message.

Replying to a Message
Messages you receive are appended to existing threads of the same number. If the new message comes from a new number, a new thread is created.
1. On the Messaging screen, tap ≧ to reply.
2. Type your reply in the text box at the bottom. You can tap ≧ if you want to reply with an MMS.
3. Tap ≧.

Forwarding a Message
2. Tap the message.
3. Tap ≧ in the menu that opens.
4. Enter a recipient for the message and edit the content if needed.
5. Tap ≧.

Copying a Message
You can copy text messages in the phone storage to the micro-UIM card, or vice versa.

Copying a Text Message from the Phone to the micro-UIM Card
1. On the Messaging screen, tap ≧ > Settings > Manage SIM card messages.
2. Tap and hold a message and then tap Copy to phone memory.

Deleting Messages or Threads
Deleting Messages in a Thread
1. On the Messaging screen, tap a thread.
2. Tap ≧ > Select item(s).
3. Tap the messages you want to delete.
4. Tap ≧ > OK.

Copying a Text Message from the Phone to the micro-UIM Card
1. On the Messaging screen, tap ≧ > Settings > Manage SIM card messages.
2. Tap and hold a message and then tap Copy to SIM card.

Deleting Message Threads
1. On the Messaging screen, tap and hold one thread you want to delete.
2. If there are more threads you want to delete, tap them one by one.
3. Tap ≧ > OK.

Changing Message Settings
Tap ≧ > Settings in the Messaging screen to change Message settings.
Calendar

Calendar on the phone works with the web-based Google Calendar™ service for creating and managing events, meetings, and appointments. It also works with the Microsoft Exchange ActiveSync calendar once you sign into your Exchange account on the phone.

To open Calendar, press the Home Key > Apps icon > Calendar.

Viewing Your Calendars and Events

Selecting Visible Calendars

1. Open the Calendar app.
2. Tap > Calendars to display.
3. In the new screen, tap to check the calendars you want to see or uncheck the calendars you'd like to hide.

Events from hidden calendars are not shown in the Calendar app.

Changing Calendar Views

You can view your calendars in different forms. The app offers four views: Month, Week, Day, or Agenda shown at the bottom.

You can also change to Day view from Month view by tapping any day in the grid.

• In Month view, swipe vertically to see earlier months and later months.
• In Week or Day view, swipe horizontally to see earlier weeks/days and later weeks/days.
• When you are viewing earlier or later days, weeks, or months, tap at the top to quickly switch to today.

Viewing Event Details

In Agenda, Day, or Week view, tap an event to view its details.
In Month view, tap a day to switch to Day view. Then tap an event to view its details.

Creating an Event

1. In any Calendar view, tap to open an event details screen for a new event.
2. You can also tap a spot in Day or Week view twice to add an event to that time spot.
3. Enter a name, location, time span, and other additional details about the event.

NOTE: If you have more than one calendar, you can choose the calendar to which to add the event by tapping the current calendar above the Event name box.

4. Tap DONE.

Editing or Deleting an Event

1. Find the event you want to edit or delete.
2. Open its details screen (see Viewing Your Calendars and Events – Viewing Event Details).
3. Choose one of the following options:
   • To edit the event, tap . Tap DONE to save your changes.
   • To delete the event, tap > OK.

Changing Calendar Settings

To change Calendar settings, open a Calendar view (Day, Week, Month, or Agenda) and then tap > Settings.
Google+

Google+ is a social networking service offered by Google. The Google+ application on your phone enables you to manage your data, chat with online contacts, organize them in different circles, and share your selected information.

Press the Home Key > Google > Google+. The first time you open the Google+ app, select the photo and video backup and contact sync options.

**NOTE:** For a detailed guide for Google+, open Google+ and tap > Help to view the online instructions.

Getting Started With Google+

Open the Google+ app and tap Home near the top of the screen to use the following features:

- **Home:** Add a suggested person, or see posts people have shared with you, a circle you are in, or everyone.
- **Circles:** Find people to add to your Google+ circles, create new circles, or view and organize people into circles based on your relationships. You can also follow content posted by people you find interesting.
- **Find communities:** Search and join all kinds of online communities, where people gather for the sharing and discussion of a common topic.
- **Photos:** View photos you uploaded, photos of you, photos from your posts, and more.

- **Locations:** See your friends’ locations on the map and configure your location sharing settings.
- **Events:** Manage your social calendar. You can add events, invite people, and then share photos in real time from the event.

Changing Google+ Settings

To change Google+ settings, open Google+ and tap > Settings.

Signing out of Google+

If you are already signed in to the app, you can sign out by following these steps.

Press the Home Key > Google > Google+.

1. Tap > Settings and then tap your account.
2. Tap Sign out.

Browser

Use Browser to view web pages and search for information.

Opening the Browser

Press the Home Key > . The last web page you were viewing is displayed. If you have not used Browser recently, your home page opens.

Browser also opens when you tap a web link—for example, in an email or a text message.

Opening a Web Page or Searching the Web

1. Open the Browser app.
2. Tap the address box at the top of the web page. If the address box isn’t visible, swipe down a little to show it.
3. Enter the address (URL) of a web page. Or, enter terms you want to search for. You can also tap to search by voice.
4. Tap a URL or search suggestion or tap Go on the keyboard to open the web page or search results.

**NOTES:**

- Tap at the bottom of the screen if you want to stop opening the page.
- Tap at the bottom of the screen if you want to open a new page.

Setting the Home Page

Your home page opens when you open a new browser tab, when you start Browser after restarting your phone, or after not using the app for a while.

1. Open the page you want to set as your home page.
2. Tap > Settings > General > Set homepage.
3. Tap Current page or one of the following options:

- **Blank page:** Open browser tab without opening a web page by default. This can make new Browser tabs open more quickly.
- **Default page:** Set the factory default URL as the homepage.
- **Most visited sites:** Every new browser tab displays a list of your frequently visited sites for you to choose from.
- **Other:** Type a URL as the homepage.

Getting Information About the Current Page

Tap > Page info.

Working With an Opened Page

While viewing most web pages, you can do the following operations:

- **Scroll:** Swipe the screen in any direction.
- **Zoom out:** Tap the screen or pinch two fingers together.
• Zoom in: Tap the screen or spread two fingers apart.
• Go back: Tap to return to the page you’ve viewed previously in the same window.
• Go forward: Tap .
• Refresh the page: Tap beside the address bar.
• Find text on the page: Tap > Find on page and type the terms you want to search for.
• Send the page URL to friends: Tap > Share page and select how you want to send the URL.
• Follow a link: Tap a link on the web page to open it.
• Save the page for offline reading: Tap > Save for offline reading. You can tap > Bookmark > SAVED PAGES to read them. To go back to a live webpage, tap > Go live.

**NOTE:** Besides links, Browser also recognizes some phone numbers, addresses, and similar information for you to act on. Try tapping them and see what happens.

**Using Multiple Browser Tabs**
You can open several web pages at the same time (one page in each tab) and switch between them freely.

**Opening a New Browser Tab**
1. Tap at the bottom of the screen. The number in the icon indicates the number of currently active browser windows.
2. Tap . A new browser window opens and the homepage is loaded.

**Switching Between Tabs**
1. Tap at the bottom of the screen.
2. Swipe vertically to scroll through the list of opened tabs.
3. Tap the thumbnail of the tab you want to open.

**NOTE:** Swipe a thumbnail horizontally or tap its X to close the tab.

**Using Incognito Tabs for Privacy Browsing**
Pages you view in incognito tabs won’t appear in your browsing history or search history. No trace will be left on your phone once you close the tab.

1. Tap at the bottom of the screen.
2. Tap > New incognito tab.

**Downloading Files**
Tap and hold an image or a link to a file or to another webpage. In the menu that opens, tap Save image or Save link.
The downloaded files are saved to your phone or the memory card. You can view or open them in the Downloads app (Home Key > Apps icon > Downloads).

**Using Bookmarks**
Save web URLs as bookmarks to open them easily in the future.

To open a bookmark, tap > Bookmarks in a browser tab and then tap the bookmark.

**Bookmarking a Web Page**
1. Open the web page.
2. Tap > Save to bookmarks.
3. Edit the bookmark label and address if necessary, or choose a different account. Tap the name beside Add to to change the place where the bookmark will be stored.
4. Tap OK.

**Editing a Bookmark**
1. Tap > Bookmarks.
2. Tap and hold the bookmark.
3. Tap Edit bookmark.
4. Edit the label, address, account, or location of the bookmark in the dialog that opens.
5. Tap OK.

**NOTE:** Preinstalled bookmarks may not be edited.

**Deleting a Bookmark**
1. Tap > Bookmarks.
2. Tap and hold the bookmark.
3. Tap Delete bookmark.
4. Tap OK.

**NOTE:** Preinstalled bookmarks may not be deleted.

**Viewing Your Browsing History**
1. Open the Browser app and tap > Bookmarks.
2. Tap the HISTORY tab.
3. Tap a time span to view the web pages you browsed during that time. You can tap an item to reopen the web page.

**Changing Browser Settings**
You can configure a number of Browser settings to customize the way you browse the web, including several that you can use to control your privacy.
To open the Browser settings screen, tap > Settings.
Activating Location Services
To use Google Maps, and to find your location on Google Maps, you must have location services turned on on your phone.
1. Press the Home Key > Apps icon > Settings > Location.
2. Slide the Location switch to the ON position to turn on location access.
3. When location access is enabled, tap Mode to select location modes you want to use.
   - High accuracy: Get accurate location using both GPS and Wi-Fi as well as mobile networks.
   - Battery saving: Use only Wi-Fi and mobile networks to get your approximate location. This will drain less power from your battery than using GPS.
   - Device only: Use GPS to pinpoint your location.
   - Accelerated location: Slide the switch to turn on/off the Qualcomm® IZat™ hardware accelerated location feature.

Getting Your Location
1. Press the Home Key > Google > Maps.
The map centers on a blue dot and arrow that indicate your location and the direction the phone is facing.

Searching for a Location
1. Press the Home Key > Google > Maps.
2. Tap the Search field.
   NOTE: You can also tap 🗝 beside the search box to use voice search.
3. Enter the place you’re looking for in the search box at the top. You can enter an address, a city, or a type of business or establishment, for example, “museums in Shanghai.” As you enter information, suggestions from your previous searches and from popular searches appear in a list below the search box. You can tap a suggestion to search for it.
4. Tap the search icon on the keyboard. Red points indicating search results appear on the map.
5. Tap a red point to open a card at the bottom of the screen that contains summary information about the location. Slide the card up to find more information about the location as well as options for getting directions and more.

Getting Directions to Your Destination
Maps can provide directions for travel by foot, public transportation, or car.
1. Press the Home Key > Google > Maps.
2. Tap 📍.

3. Select the mode of transportation and then enter a start and end point. If your location is found, it will appear in the start point field by default. As suggested routes appear, tap one to see it on the map. Slide the bottom card up to see the route directions in a list.
   NOTE: Tap 🔍 to use Google Maps Navigation (beta) and get turn-by-turn voice directions.

Searching for Local Places
Google Maps helps you find all kinds of businesses and establishments around you. You can rate these places and get recommendations.
1. Press the Home Key > Google > Maps.
2. Navigate the map view to the area you’d like to explore and tap 🔍.
3. Swipe left or right under each category to view more options.
4. Tap a location for more information.
You can also slide up the bottom card to find out more information, such as the street address, website, and street view, or to call that place, save it to your Google account, or share it with others.
   NOTE: This feature is not available for all areas.
Google Now and Search

You can search for information on the web or on your phone using Google Search, get information when you need with Google Now without searching, or perform certain tasks by speaking.

Enabling Google Now

Google Now gets you just the right information at just the right time. It tells you today's weather before you start your day, how much traffic to expect before you leave for work, and more. You can turn Google Now on or off from within the Google app.

1. Press and hold the Home Key.
   The first time you open the Google app, you’ll see a brief explanation of how Google Now works. Tap NEXT > YES, I'M IN.

Searching With Text

1. Tap the Google Search box at the top of the home screen to search.
2. Enter the terms you want to search for and tap or tap a search suggestion.

Searching by Speaking

1. Tap to the right of the search box, or tap the search box and then say “OK Google”.
2. Speak the terms you want to search for. When you’re finished speaking, your speech is analyzed and the search is initiated.
If Google Search didn’t quite understand what you said, you are prompted to repeat your search terms. Tap or say “OK Google” and repeat your search.

Changing Search and Voice Search Settings

Open the Google app and tap > Settings to set Google Now, notifications, voice and phone search options, and to change privacy settings for your account.
To set Voice Search settings, press the Home Key > Apps icon > Settings > Language & input > Voice Search.

Camera

You can take photos and record videos. Photos and videos are stored to the phone’s memory card or to the phone’s internal storage. You can copy them to your computer or access them in the Gallery app.

Capturing a Photo

1. Press the Home Key > .
2. You can either let the camera autofocus on the center of the screen, or tap another area on the screen that you want to focus on.
   NOTE: You can pinch or spread on the screen or press the Volume keys to zoom in or zoom out.
3. Tap to take the photo.
   WARNING! Keep a safe distance when using the flash. Do not point the flash towards the eyes of people or animals.

Using Manual Camera Mode

You can use the manual camera mode to adjust more camera options for your photo, such as ISO, white balance, exposure, contrast, saturation, sharpness, etc.

1. Press the Home Key > .
3. Aim the camera at the subject and you can make the following adjustments:
   • Drag to any area on the screen that you want to focus on.
   • Drag to any area on the screen where you want the camera to meter exposure so as to adjust the photo brightness.
   • Tap to show or hide the grid or the golden spiral.
   • Tap to enable or disable the gradienter.
**Camera**

- Tap to change white balance scenario or leave it at Auto.
- Tap to select ISO level or leave it at Auto.
- Tap to adjust the photo exposure.
- Tap to take the photo.

**Using Fun Camera Mode**

1. From the home screen, tap .
2. Tap Fun.
3. Tap to select a shot mode as follows:
   - **Special effect:** Chose a camera effect for your shot, such as Fisheye, Sepia, or Mosaic.
   - **Smile:** Takes a photo automatically when the camera detects a smile.
   - **HDR:** Adds more luminosity to your photo.
   - **Interval:** Takes multiple shots at a set interval.
   - **Panorama:** Move your camera horizontally to capture a wide panorama shot.
   - **Multi-exposure:** Layer two images on top of each other with different effects.
4. Follow the on-screen instructions to take photos and add different effects.
5. Tap to take a photo.

**Recording a Video**

1. Press the Home Key > .
2. Aim the camera at the subject. You can tap any area on the screen that you want the camcorder to focus on before and during recording.

   **NOTE:** You can pinch or spread on the screen or press the Volume Key to zoom in or zoom out before and during recording.
3. Tap to start and to stop recording. You can also tap to pause and resume recording.

   **NOTE:** While recording is in progress, you can tap to take a photo.

**Customizing Camera and Video Settings**

Before taking a photo, you can tap to open the following camera setting options:

<table>
<thead>
<tr>
<th>CAMERA</th>
<th>VIDEO</th>
</tr>
</thead>
<tbody>
<tr>
<td>Picture size: Set the image size of your photo.</td>
<td>Video quality: Set the quality for the video clips.</td>
</tr>
<tr>
<td>Full screen: Set the viewfinder screen as full screen or not when the back camera is in use.</td>
<td>Time lapse: Set the time interval between each frame when you shoot time lapse videos.</td>
</tr>
<tr>
<td>Auto-review: Select whether to review the picture after you shot it. You can also set the review time.</td>
<td>Focus lock when recording: Select whether to lock the focus point on the center of the screen during video recording.</td>
</tr>
<tr>
<td>Shutter tone: Select your preferred shutter tone.</td>
<td>Geo-tagging: Select whether to store the GPS location in captured videos.</td>
</tr>
<tr>
<td>Geo-tagging: Select whether to store the GPS location in captured photos.</td>
<td>Storage location: Change the storage location for captured videos.</td>
</tr>
<tr>
<td>Storage location: Change the storage location for captured photos.</td>
<td>Restore defaults: Restore the default video settings.</td>
</tr>
<tr>
<td>Restore defaults: Restore the default camera settings.</td>
<td><strong>NOTE:</strong> Some camera and video options will change in different camera modes.</td>
</tr>
</tbody>
</table>
Opening the Gallery
Press the Home Key > Apps icon > Gallery to view albums of your pictures and videos.

Working With Albums
When you open the Gallery, all pictures and videos on your phone are displayed in a number of albums.

Viewing album contents
Tap an album to view the pictures and videos it contains.

Sharing Albums, Pictures, or Videos
1. Tap and hold an item in the Albums view to select an album or after you open an album to select a picture or a video.
2. Tap more items that you want to share.
3. Tap at the top of the screen and select how you want to share the items.

Viewing details of an item
1. Tap and hold an item until it is selected.
2. Tap > Details.

Deleting Albums
1. Tap and hold an album until it is selected.
2. Tap more albums that you want to delete.
3. Tap > OK.

Working With Pictures
Tap a picture in an album to view the picture in full screen. Double-tap the picture, or pinch two fingers together or spread them apart to zoom out or in. Slide left or right to view other pictures in the album.

Retouching Your Pictures
You can edit any photos you took and some other pictures in Gallery. The changed picture is saved in the same album as the original one, while the original is never affected.

1. While viewing a picture in full screen, tap the screen and tap to open the Photo Editor interface.
2. Tap the icons along the bottom of the screen to edit the picture.
   - Apply style effects such as bleach, blue crush, instant, and more.
   - Crop, straighten, mirror, or rotate the picture.
   - Adjust exposure, vignette, shadows, sharpness, and more.
   - Apply a frame to the picture.
   - Decorate people in the picture with comical moustaches, eye glasses, hats and more.
   - Apply a blur effect to the picture.
3. To cancel or accept the changes you’ve made to the picture, tap or at the top of the screen.
4. Tap Save to save the new picture.

NOTES:
- You can delete a picture or video by swiping it up or down in the filmstrip view. If you accidentally delete one, tap UNDO to retrieve it.
- Not all the options may be available for certain albums or pictures.

Playing Videos
1. Tap an album in Gallery and then tap the thumbnail of a video.
2. Tap at the center to start playing.
3. Tap the video to view the playback controls.

NOTE: In the Video Player, you can tap to play the video in a small floating window and continue with other tasks on the phone.
Press the Home Key > Apps icon > Music to play audio files stored on your phone. Music supports a wide variety of audio formats, so it can play music you purchase from online stores, music you copy from your CD collection, and more.

Copying Music Files to Your Phone
Before using Music, you need to copy audio files from your computer to your phone or memory card.

Copying From a Computer
1. Connect your phone and the computer with a USB cable.
2. Tap Media device (MTP) (if supported on the PC) or Camera (PTP) to browse the files on the phone storage and the microSDHC card. (see Connecting to Networks and Devices – Connecting to Your Computer via USB).
3. Copy the music file from the PC to the phone storage or microSDHC card.

Downloading From the Internet
You can download music files when browsing web pages (see Browser – Downloading Files).

Receiving via Bluetooth
You can receive music files from other devices via Bluetooth (see Connecting to Networks and Devices – Connecting to Bluetooth Devices – Receive Data via Bluetooth).

Viewing Your Music Library
Press the Home Key > Apps icon > Music and your music library is displayed. All your audio files are cataloged according to the information stored in the files. Tap the tabs at the top of the screen to view your music library organized by Songs, Playlists, Folders, Albums, Artists, or Genres. You can also tap RECENTLY PLAYED or FAVORITE to browse songs you recently played or you have added as favorites.

NOTE: If an audio file is being played, its summary information is displayed at the bottom of the screen. Tap to open the playback screen.

Setting a Song as the Default Ringtone
The song will be used as the ringtone for all incoming calls, except those from contacts you have assigned special ringtones to (see People – Editing Contacts – Setting a Ringtone for a Contact).
1. Press the Home Key > Apps icon > Music to see the music library.
   
   NOTE: If you are in the playback screen, tap to return to the music library.
2. Tap next to a song in any list.
3. In the menu that opens, tap Use as ringtone.
4. Tap Phone Ringtone or Notification Ringtone.

NOTE: If the song is being played, you can tap > Use as ringtone in the playback screen.

Playing Music
Tap a song in the music library to listen to it. The following playback screen appears:

1 Song and artist information.
2 Tap to open the Dolby app.
3 Tap to open the current playlist.
4 Playback control. Skip songs or pause and resume playback. Drag the slider to jump to any part of the song.
5 Tap to add a song to the Favorites playlist.
6 Album artwork.
7 Tap to toggle shuffle and repeat mode; no repeat, repeat the current song, or repeat the current playlist.
8 View more options.

Managing Playlists
Create playlists to organize your music files into sets of songs, so that you can play the songs you like in the order you prefer.
• Tap > Add to playlist next to a song to add it to a playlist or create a new playlist.
• Tap > Delete Playlist next to a playlist to delete the playlist.
• Tap > Rename Playlist next to a playlist to rename the playlist.
### The Play Music app

The Play Music app works with Google Music, Google’s online music store and streaming service. You can stream via mobile data or Wi-Fi and listen to your favorite songs that you’ve added to your online Google Music library. You can also play audio files you’ve copied directly to your phone from a computer.

**NOTE:** The availability of Google Music is dependent on your region. If it is not available, or you don’t have a mobile data or Wi-Fi connection, you can only play music stored on your phone.

### Playing Your Music

1. **Press the Home Key > Google > Play Music.** If you are prompted, select an account to access its online music library.

   The app searches your online library and your phone for music and playlists before displaying your recent activity. Tap **My Library** to view your library, which is organized by **GENRES**, **ARTISTS**, **ALBUMS**, and **SONGS**. Tap **Playlists** to view existing playlists.

2. **Tap a song to play it.** When the song is playing, tap the summary information at the bottom to display the playback screen.

</tbody>
</table>

You can still control the music when you are not in the playback screen.

- In the Play Music app, tap the summary information at the bottom of the screen to restore the playback screen.
- In other apps, swipe down on the Notification Panel. Tap the song title to restore the playback screen, or just pause/resume playback or skip to the next/previous song.
- When the screen is locked, the song information and playback controls are displayed on top of the screen. You can pause/resume playback or skip songs.

### Managing Playlists

Create playlists to organize your music files into sets of songs so that you can play the songs you like in the order you prefer. To view all your playlists, tap **Playlists**.

- **Tap ‡ > Add to playlist next to a song or a playlist to add it to a playlist or create a new playlist.**
- **Tap ‡ > Delete > OK next to a playlist to delete the playlist.**
- **Tap a playlist to view its content. You can tap ‡ > Remove from playlist next to the song you want to remove, or drag ‡ to the left of each song to rearrange its order in the playlist.**
Video Player

Use the Video Player to play various kinds of videos.

Opening the Video Library
Press the Home Key > Apps icon > Video Player to view your video library.

Playing and Controlling Videos
- Tap a video in the video library to play it. Rotate the phone on its side to watch the video in landscape view.
- Tap the video to show the playback controls. Tap to play the video in a small floating window and continue with other tasks on the phone.

Managing Video Files

Deleting Videos
1. Tap and hold a video in the video library.
2. To remove more videos, tap them.
3. Tap OK at the bottom left of the screen.
4. Tap OK.

Sharing Videos
1. Tap and hold a video in the video library.
2. To share more videos, tap them.
3. Tap at the bottom right of the screen and select how you want to share them.

Renaming a Video
1. Tap next to the video you want to rename.
2. Tap Rename.
3. Type the new video name and tap OK.

Viewing Details of a Video
1. Tap next to a video you want to view the details of.
2. Tap Details.

Trimming a Video
1. Tap a video in the video library to start playing it.
2. Tap > Trim.
3. Drag the two tabs on the progress bar to select the portion you want to keep.
   (If necessary, tap to preview the selected portion.
4. Tap OK. The trimmed video is saved as a new video file.

Sound Recorder

Sound Recorder enables you to record voice memos and listen to them whenever you like.

Recording a Voice Memo
1. Press the Home Key > Apps icon > Sound Recorder.
2. Tap to start recording. Tap > OK to cancel recording. Tap to pause and > to continue recording.
3. Tap to stop recording. The memo is automatically saved.
   If you don’t want to save the memo after recording it, tap > OK to delete it.

Playing a Voice Memo

Playing a Memo You Just Recorded
Tap at the bottom of the screen.

Playing Any Saved Memo
1. Tap at the top right of the screen to see all recordings.
2. Tap the title of a memo to play it.
   NOTE: You can also tap at the right of the memo to delete, share, rename, tag, trim it, check its file information, or set it as your phone ringtone.
Calculator
Press the Home Key > Apps icon > Calculator.

NOTES:
• Turn the phone to landscape to view more calculator options.
• Tap Tip to access the tip calculator.

Chrome
Use Google Chrome to browse the Internet. Chrome on your phone can sync bookmarks, browsing history, and opened tabs from your Google account.
Press the Home Key > Google > Chrome to browse the Internet.

Clock
Set alarms or turn the phone into a bedside clock.

Setting a New Alarm
1. Press the Home Key > Apps icon > Clock.
2. Tap a default alarm to configure it, or tap at the bottom of the screen to create a new alarm.
3. Set up the alarm options, such as time, repeat, alarm sound and label.
4. Tap Save to save and exit.

NOTE: To enable or disable existing alarms, tap or .

Using the Bed Clock
The Bed Clock displays the current time and the next alarm.
1. Press the Home Key > Apps icon > Clock.
2. If necessary, tap > Preferences in the Alarm screen to set up the Bed Clock options. Then press the Back Key to return to the Alarm screen.
• Enable bed clock: Turn on or off the Bed Clock function.
• Bed clock never sleeps: Keep the Bed Clock screen turned on when charging the phone.
3. Tap > Bed clock to open the Bed Clock screen.

Stopwatch and Countdown
1. Tap or in Clock to use the countdown or stopwatch.
2. Countdown allows you to set a time and count down to zero, while Stopwatch allows you to record lap times.

World Time
1. Tap in Clock to check local time for cities around the world.
2. Tap at the bottom to add a new city.

Dolby
Press the Home Key > Apps icon > Dolby to select or customize a Dolby profile. You can also tap to turn off Dolby.

Downloads
The Downloads app keeps a record of the files you have downloaded using the Browser, Email, or Gmail app.
Press the Home Key > Apps icon > Downloads to check the record.
• Tap a file to open it with the appropriate applications.
• Tap and hold a file, or check the box in front of it, to delete or share it.

Google Drive
Press the Home Key > Google > Drive. The Drive app allows you to store files on Google servers for free after you sign in to your Google account. You can access them on your computers, your phones and other devices, share them, or collaborate with others.

File Manager
Quickly access all of your images, videos, audio clips, and other types of files on your phone and on the memory card.
1. Press the Home Key > Apps icon > File Manager. The folders are organized by category, phone storage, and memory card storage.
• Tap folders and files to access stored items.
• Tap and hold an item to access option icons, such as Copy, Move, Share, or Delete.

Play Books
Press the Home Key > Google > Play Books to read ebooks purchased from the Play Store.
• Tap > My Library to view your book library. Tap a book cover to read it.
• Tap > Shop to buy more books from the Play Store. Tap to search by book title or author name.

More Apps

Note
Press the Home Key > Apps icon > Note to save and view your text notes.
• Tap a category of note, and tap to create a new note. Then enter your text and tap SAVE to save it.
• Tap a note to view its entire content. You can also edit it, delete it, share it, export it, or move it to a notebook.

More Apps

• To copy or move an item, navigate to a new location and tap PASTE.
• Tap Phone/SD card to create a new folder in the current directory.
Play Movies & TV
Press the Home Key > Google > Play Movies & TV to watch movies you rent from Play Store as well as your personal videos stored on the phone.
• Tap ☰ > My Library to view your movies or TV shows. You can stream them for online watching or download them to watch offline.

Unlock Shortcuts
You can change or delete the application shortcuts at the bottom of the lock screen.
1. Press the Home Key > Apps icon > Unlock Shortcuts.
2. Tap an application icon to delete its shortcut on the lock screen, or tap + and then select an application from the list to add it as the shortcut.

Voice Dialer
Voice Dialer is speech recognition software. You can use it to dial a phone number in your contacts, open menus or launch phone functions.
1. Press the Home Key > Apps icon > Voice Dialer.
2. When you see “Listening”, follow the on-screen examples to speak “Call…”, “Dial…”, or “Open…” to make phone calls or open phone menus and applications.

Task Manager
Press the Home Key > Apps icon > Task Manager to view or stop applications.
• Tap a task in the Tasks tab to switch to its screen, force stop it, or see its details.
• Tap the Apps tab to manage all the apps on your phone.
• Tap the Resources tab to view the real-time system resources information.

YouTube
Press the Home Key > Google > YouTube. You can watch YouTube videos or upload your own.

Play Store
Press the Home Key > Play Movies & TV. You can buy or rent music, books, movies, and apps and download them to your phone.
NOTE: The content you can access in Play Store depends on your region and your service provider.

Browsing and Searching Apps
You can browse apps by category and sort them in different ways. Tap a top-level category, such as Games, and tap the app from any subcategory. You can also search for apps using an app’s name or description, or the developer’s name. Just tap ☰ and enter the search terms.

Downloading and Installing Apps
When you find the app you are interested in through browsing or searching, tap it to open its details screen, where more information about the app is displayed.
1. Tap INSTALL (free apps) or the price (paid apps) in the app details screen. If the app is not free, you will need to sign in to your Google Wallet™ account and select a payment method.
CAUTION: Once installed, some apps can access many functions or a significant amount of your personal data. The Play Store will show you what the app can access. Tap ACCEPT to accept the permissions for the app or tap the Back Key to cancel. Your app will start downloading immediately or once payment is successfully authorized.
2. The app is successfully installed when ☰ appears in the status bar. You can find the new app after pressing the Home Key > Apps icon.

Creating a Google Wallet Account
You must have a Google Wallet account associated with your Google Account to purchase items from the Google Play Store app.
Do one of the following:
• On your computer, go to wallet.google.com to create a Google Wallet account.
• The first time you use your phone to buy an item from Play Store, you’re prompted to enter your billing information to set up a Google Wallet account.
WARNING! When you’ve used Google Wallet once to purchase items from the Play Store app, the phone remembers your password so you don’t need to enter it the next time. For this reason, you should secure your phone to prevent others from using it without your permission.
Requesting a Refund for a Paid App

If you are not satisfied with an app, you can ask for a refund within 15 minutes of the purchase. Your credit card is not charged and the app is uninstalled from your phone.

If you change your mind, you can install the app again, but you can't request a refund a second time. For details, please read the Play Store help information.

1. Press the Home Key > .
2. Tap > My apps.
3. Tap the app to uninstall for a refund. The details screen for the app opens.
4. Tap REFUND and then tap UNINSTALL. Your app is uninstalled and the charge is cancelled.

Uninstalling an App

1. In the Apps screen of Play Store, tap > My apps.
2. Tap an app to open its details screen.
3. Tap UNINSTALL > OK.

Managing Your Downloads

After you’ve downloaded and installed an app, you can rate it, view it in a list with your other downloaded apps, configure it to update itself automatically, and more.

Viewing Your Downloaded Apps

1. In the Apps screen of Play Store, tap > My apps.
2. Your list of installed apps opens. You can tap one to rate it, uninstall it, request a refund, update it, and more.

Settings

Press the Home Key > Apps icon > Settings. Settings contains most of the tools for customizing and configuring your device.

General Settings

Airplane Mode
Turn voice and data transmission on or off.

Wi-Fi
Turn Wi-Fi on or off and configure your Wi-Fi connections (see Connecting to Networks and Devices – Connecting to Wi-Fi).

Bluetooth
Turn Bluetooth on or off and configure your Bluetooth connections (see Connecting to Networks and Devices – Connecting to Bluetooth Devices).

Mobile Networks
Control mobile data use and data roaming (see Connecting to Networks and Devices – Connecting to Mobile Networks).

Sound
Adjust volumes (see Personalizing – Adjusting Volumes), toggle sound and mute (see Personalizing – Switching to Silent Mode), set up ringtone and notification sound (see Personalizing – Changing the Ringtone and Notification Sound), and select system sounds (see Personalizing – Turning Touch Sounds On/Off). Tap Silent mode to turn off all sounds except media and alarm, or enable silent mode with vibration.

Display
• Brightness: Set the brightness of the display.
• Wallpaper: Select a background image for the home screen or lock screen.
• Auto-rotate screen: Click the checkbox to auto-rotate screen.
• Sleep: Set the length of time of inactivity before the screen turns off automatically.
• Daydream: Set the daydream on the screen.
• Font size: Set the font size of the text on the screen.
• Pulse notification light: The LED flashes to notify you of missed calls, new messages, and other events.
• Touch key light duration: Tap to set the duration of the touch key light.

Date and Time
Set date, time, time zone, and how date and time are displayed. You can also use network-provided data.

Language and Input
• Language: Select a language for your system.
• Spell checker: Use Google Spell Checker to check for spelling errors when entering text and change its settings.
• Personal dictionary: Add new words to the phone’s dictionary or remove words from the
**Settings**

dictionary. The words you add are used for spelling check and word suggestion.

- **KEYBOARD & INPUT METHODS**: Configure text input settings (see Knowing the Basics – Entering Text – Touch Input Settings).

- **Voice Search**
  - **Languages**: Select the language you use when entering text by speaking or searching by speaking.
  - **“OK Google” Detection**: When this is checked, you can say “OK Google” when viewing the Google Now screen rather than tapping the Microphone icon to initiate a voice search or action.
  - **Speech output**: To turn on speech output only when you’ve got a headset attached to your phone, select **Hands-free only**.
  - **Offline speech recognition**: Select one or more additional language packages so you can use speech recognition when you do not have a network connection.
  - **Block offensive words**: Replace offensive words with an asterisk (*) when you use Google voice recognition to transcribe your voice into text.
  - **Bluetooth headset**: Listen for your voice input through a Bluetooth headset when it is connected to your phone.

- **Text-to-speech output**
  - **PREFERRED ENGINE**: Select the speech synthesis engine you want to use or change its settings.
  - **Speech rate**: Select how quickly you want the synthesizer to speak.
  - **Listen to an example**: Play a brief sample of the speech synthesizer, using your current settings.
  - **Default language status**: Check the default language status.
  - **Pointer speed**: Select how fast the pointer/mouse should scroll when you connect the phone to a trackpad or mouse accessory.

**Wireless and Networks**

**Data Usage**

Tap the ON/OFF switch to turn on or off mobile data.

You can check how much data has been used during the time cycle you set, set a mobile data limit and warning, see what apps have been using mobile data, allow data roaming, or restrict background data for individual apps.

- **VPN**: Set up and connect to virtual private networks (see Connecting to Networks and Devices – Connecting to Virtual Private Networks).

- **Default SMS App**

In the Settings app, tap More under WIRELESS & NETWORKS and select Default SMS app to choose the preferred application for sending and receiving SMS.

**Device**

**Storage**

Check memory information for your external memory card and internal storage.

- **Unmount SD card**: Unmount the memory card from your phone so that you can safely remove the card while the phone is on.

- **Erase external SD card**: Erase all data on your memory card and prepare it for use with your phone.

**Power saving mode**

Check how much power remains for the battery and what has been using the battery, or select your preferred power save mode.

**Apps**

See apps installed on your phone and manage them. Tap an app in the **DOWNLOADED**, **RUNNING**, or **ALL** tab to see its information. You can stop the app, uninstall or disable the app, clear data and cache, or move the app between the internal storage and the memory card.

**NOTE**: Not all applications can be moved or uninstalled.

**Connect to PC**

Select the USB connection mode between your phone and PC (see Connecting to Networks and Devices – Connecting to Your Computer via USB – Connecting Your Phone to a Computer via USB).

**Call settings**

Configure phone call related options, such as ringtone, voicemail and Internet call. For more information, see Phone Calls – Adjusting Your Call Settings.

**Personal**

**Location**

Activate location services to determine your location (see Google Maps – Activating Location Services).

**Security**

- **Screen lock**: Lock the screen with long press, pattern, PIN, or password (see Personalizing – Protecting Your Phone With Screen Locks).

- **Owner info**: Set the text that you may display on the lock screen.
Encrypt phone: Encrypt your data on the phone to protect your privacy (see Personalizing – Protecting Your Phone With Encryption).

Set up SIM card lock: Require a PIN to use the phone.

Make passwords visible: Display passwords as you enter them.

Device administrators: View or deactivate apps you have authorized to be device administrators.

Unknown sources: Check this option to permit installation of apps from sources other than the Play Store.

Verify apps: Disallow or warn before installation of apps that may cause harm.

Storage type: Choose the storage type.

Trusted credentials: Display trusted CA certificates.

Install from SD card: Install certificates from the memory card.

Clear credentials: Delete all certificates.

Backup and Reset

Back up my data: Back up app data, Wi-Fi passwords, and other settings to Google servers after you sign in to your Google account.

Backup account: Back up data to a Gmail address.

Automatic restore: Restore previously backed up settings and data when you reinstall an app.

Factory data reset: Reset your phone to factory default settings. All your personal data from the phone’s internal storage will be erased. You can also erase the data on the memory card during the process.

Accounts

Manage your accounts and synchronization. Tap Add account to sign in to or create accounts on your phone.

Tap an account type to see that type of accounts you have added and adjust the accounts’ settings.

System

Accessibility

Configure the system accessibility options and accessibility plug-ins on your phone, such as using TalkBack for low-vision users.

Printing

Configure cloud printing service options, manage print jobs and more.

Developer Options

Developer options contains settings that are useful when developing Android applications. The menu is hidden until you tap Build Number in the About phone menu 7 times.

Software Update

You can check your system’s software version, check for updates, continue update, or check the profile.

About Phone

View phone status, legal information and other information. Meanwhile, you can also update your phone software through storage card updates.
Upgrading the Phone Software

There are several ways to upgrade your phone software:

- Use the online upgrade tool for mobile terminal products.
- Use the one-press upgrade package offered by your mobile service provider.
- Use your PC to download an upgrade package to your microSDHC card and install it to your phone from the card.

**NOTE:** Visit the ZTE official handset service support website (http://www.ztedevice.com/support) and click your country or region to learn more about the above upgrade methods, as well as which phones and methods are supported.

Troubleshooting

If you encounter problems while using the phone, or if it performs abnormally, you can refer to the chart below. If your particular problem cannot be resolved using the information in the chart, contact the dealer where you purchased the phone.

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Causes</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor reception</td>
<td>The network signal is too weak at your current location, for example, in a basement or near a tall building, because wireless transmissions cannot effectively reach it.</td>
<td>Move to a location where the network signal can be properly received.</td>
</tr>
<tr>
<td></td>
<td>The network is busy at the current time (for example, during peak times, there may be too much network traffic to handle additional calls).</td>
<td>Avoid using the phone at such times, or try again after waiting a short time.</td>
</tr>
<tr>
<td></td>
<td>You are too far away from a base station for your service provider.</td>
<td>You can request a service area map from your service provider.</td>
</tr>
<tr>
<td>Echo or noise</td>
<td>Poor network link quality on the part of your service provider.</td>
<td>End the call and dial again. You may be switched to a better-quality network link or phone line.</td>
</tr>
<tr>
<td></td>
<td>Poor local telephone line quality.</td>
<td>End the call and dial again. You may be switched to a better-quality network link or phone line.</td>
</tr>
<tr>
<td>Unable to select certain features</td>
<td>Your service provider does not support these features, or you have not applied for services that provide these features.</td>
<td>Contact your service provider.</td>
</tr>
<tr>
<td>Battery not charging</td>
<td>The battery or battery charger is damaged.</td>
<td>Contact the dealer.</td>
</tr>
<tr>
<td></td>
<td>The phone’s temperature is below 32°F (0°C) or higher than 113°F (45°C).</td>
<td>Adjust the battery charging environment to avoid extremes of temperature.</td>
</tr>
<tr>
<td></td>
<td>Poor contact between the battery and charger.</td>
<td>Check all connectors to make sure all connections have been properly made.</td>
</tr>
<tr>
<td>Problem</td>
<td>Possible Causes</td>
<td>Possible Solution</td>
</tr>
<tr>
<td>---------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------</td>
<td>-----------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Shortened standby time</td>
<td>The standby time is related to your service provider system configuration. The same phone used with different service providers' systems will not provide exactly the same length of standby time.</td>
<td>If you are located in an area where signaling is weak, temporarily power off the phone.</td>
</tr>
<tr>
<td></td>
<td>The battery is depleted. In high temperature environments, battery life will be shortened.</td>
<td>Use a new battery.</td>
</tr>
<tr>
<td></td>
<td>If you are not able to connect to the network, the phone will continue to send out signals as it attempts to locate a base station. Doing so consumes battery power and will consequently shorten standby time.</td>
<td>Change your location to one where the network is accessible, or temporarily turn off your phone.</td>
</tr>
<tr>
<td>Cannot turn your phone on</td>
<td>Battery power has been depleted.</td>
<td>Recharge the phone’s battery.</td>
</tr>
<tr>
<td>Unable to connect to the network</td>
<td>You are not within the network’s service area.</td>
<td>Check the service area with your service provider.</td>
</tr>
<tr>
<td>Cannot make outgoing calls</td>
<td>Poor signal</td>
<td>Move to an open space, or if you are inside a building, move closer to a window.</td>
</tr>
<tr>
<td></td>
<td>You have activated the Fixed dial numbers feature.</td>
<td>Go to Call settings to check the Fixed Dialing Numbers and disable it.</td>
</tr>
<tr>
<td></td>
<td>You have activated the Call barring feature.</td>
<td>Upgrade the phone software.</td>
</tr>
<tr>
<td>PIN Code blocked</td>
<td>You have entered an incorrect PIN code three consecutive times.</td>
<td>Contact your service provider.</td>
</tr>
<tr>
<td>Unable to enter information into the phonebook</td>
<td>The phonebook’s memory is already full.</td>
<td>Delete unnecessary data from the contacts.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Problem</th>
<th>Possible Causes</th>
<th>Possible Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phone crashes, reboots, freezes, or cannot be powered on</td>
<td>Some third-party software is not compatible with your phone.</td>
<td>Reset the phone to factory status.</td>
</tr>
<tr>
<td>Cannot answer incoming calls</td>
<td>You have activated the Call barring feature.</td>
<td>Enter safety mode and uninstall the software that may cause the problem.</td>
</tr>
</tbody>

For Your Safety

General Safety

- Don’t make or receive handheld calls while driving. Never text while driving.
- Keep your phone at least 15 mm away from your ear or body while making calls.
- Small parts may cause choking.
- Your phone can produce a loud sound.
- Avoid contact with anything magnetic.
- Keep away from pacemakers and other electronic medical devices.
- Power off when asked to in hospitals and medical facilities.
- Power off when told to in aircrafts and airports.
- Power off when near explosive materials or liquids.

Radio Frequency (RF) Energy

This model phone meets the government’s requirements for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR values for this model phone as reported to the FCC when tested for use at the ear and on the body are:

- Head: 0.60 W/kg, Body: 1.11 W/kg

*In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

FCC Compliance

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

For Your Safety
For Your Safety

CAUTION: Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

Hearing Aid Compatibility (HAC) Regulations for Mobile Phones

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants, digital wireless phones sometimes do because of electromagnetic energy emitted by the phone’s antenna, backlight, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19-2011).

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate. The wireless telephone industry has developed ratings for some of their mobile phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all hearing devices are rated and any consequences of its use.

You alone are responsible for how you use your phone and any consequences of its use.

Hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference with hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device’s telecoil (“T Switch” or “Telephone Switch”) than unrated phones. T4 is the better/higher of the two ratings. (Note that not all hearing devices contain telecoils.)

Your Z936L has been tested for hearing aid device compatibility and has an M4/T4 rating.

Distraction

Driving

Full attention must be given to driving at all times in order to reduce the risk of an accident. Using a phone while driving (even with a hands free kit) can cause distraction and lead to an accident. You must comply with local laws and regulations restricting the use of wireless devices while driving.

Operating Machinery

Full attention must be given to operating machinery in order to reduce the risk of an accident.

Product Handling

General Statement on Handling and Use

You alone are responsible for how you use your phone and any consequences of its use. You must always turn off your phone wherever the use of a phone is prohibited. Use of your phone is subject to safety measures designed to protect users and their environment.
For Your Safety

• Always treat your phone and its accessories with care and keep it in a clean and dust-free place.
• Keep the screen and camera lens clean. Unclean screen or camera lens may slow down the phone’s reaction to your operations or lower image quality.
• Clean the device and its accessories with a soft material such as cleaning cloth for eyeglass lenses. Do not use alcohol or other corrosive substances for cleaning or allow them to get inside.
• Do not expose your phone or its accessories to open flames or lit tobacco products.
• Do not expose your phone or its accessories to liquid, moisture or high humidity.
• Do not drop, throw or try to bend your phone or its accessories.
• Do not paint your phone or its accessories.
• Do not attempt to disassemble your phone or its accessories. Only authorized personnel can do so.
• Do not expose or use your phone or its accessories in an environment with or that can reach extreme temperatures, minimum - [5] and maximum + [50] degrees Celsius.
• Do not place your phone inside or near heating equipment or high-pressure containers, such as water heaters, microwave ovens, or hot cooking utensils. Otherwise, your phone may be damaged.
• Please check local regulations for disposal of electronic products.

• Do not carry your phone in your back pocket as it could break when you sit down.

Small Children
Do not leave your phone and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or could accidentally damage the phone. Your phone contains small parts with sharp edges that may cause an injury or may become detached and create a choking hazard.

Demagnetization
To avoid the risk of demagnetization, do not allow electronic devices or magnetic media to be close to your phone for a long time.

Electrostatic Discharge (ESD)
Do not touch the UIM/microSDHC card’s metal connectors.

Antenna
Do not touch the antenna unnecessarily.

Normal Use Position
When placing or receiving a phone call, hold your phone to your ear, with the bottom towards your mouth.

Air Bags
Do not place a phone in the area over an air bag or in the air bag deployment area as an airbag inflates with great force and serious injury could result. Store the phone safely before driving your vehicle.

Seizures/Blackouts
The phone can produce a bright or flashing light. A small percentage of people may be susceptible to blackouts or seizures (even if they have never had one before) when exposed to flashing lights or light patterns such as when playing games or watching video. If you have experienced seizures or blackouts or have a family history of such occurrences, please consult a physician.

Repetitive Stress Injuries
To minimize the risk of Repetitive Strain Injury (RSI) when texting or playing games with your phone:
• Do not grip the phone too tightly.
• Press the buttons lightly.
• Use the special features that are designed to minimize the times of pressing buttons, such as Message Templates and Predictive Text.
• Take many breaks to stretch and relax.

Emergency Calls
This phone, like any wireless phone, operates using radio signals, which cannot guarantee connection in all conditions. Therefore, you must never rely solely on any wireless phone for emergency communications.

Loud Noise
This phone is capable of producing loud noises, which may damage your hearing. Turn down the volume before using headphones, Bluetooth stereo headphones or other audio devices.

Phone Heating
Your phone may become warm during charging and during normal use.

Electrical Safety
Accessories
Use only approved accessories. Do not connect with incompatible products or accessories. Take care not to touch or allow metal objects, such as coins or key rings, to contact or short-circuit in the charging jack terminals. Never puncture the surface of the phone with sharp objects.

Connection to a Car
Seek professional advice when connecting a phone interface to the vehicle electrical system.

Faulty and Damaged Products
Do not attempt to disassemble the phone or its accessories. Only qualified personnel can service or repair the phone or its accessories. If your phone (or its accessories) has been submerged in water, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorized service center.

CTIA Requirements
• Do not disassemble or crush, bend or deform, puncture, or shred.
• Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
• Only use the battery for the system for which it is specified.
• Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazard.
• Do not short-circuit a battery or allow metallic conductive objects to contact battery terminals.
• Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard.
• Promptly dispose of used batteries in accordance with local regulations.
• Battery usage by children should be supervised.
• Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.
• Improper battery use may result in a fire, explosion, or other hazard.
• The phone shall only be connected to CTIA certified adapters, products that bear the USB-IF logo or products that have completed the USB-IF compliance program.

Radio Frequency Interference

General Statement on Interference
Care must be taken when using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers
Pacemaker manufacturers recommend that a minimum separation of 15 cm be maintained between a mobile phone and a pacemaker to avoid potential interference with the pacemaker. To achieve this, use the phone on the opposite ear to your pacemaker and do not carry it in a breast pocket.

Hearing Aids
People with hearing aids or other cochlear implants may experience interfering noises when using wireless devices or when one is nearby. The level of interference will depend on the type of hearing device and the distance from the interference source. Increasing the separation between them may reduce the interference. You may also consult your hearing aid manufacturer to discuss alternatives.

Medical Devices
Please consult your doctor and the device manufacturer to determine if operation of your phone may interfere with the operation of your medical device.

Hospitals
Turn off your wireless device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.

Aircraft
Turn off your wireless device whenever you are instructed to do so by airport or airline staff. Consult the airline staff about the use of wireless devices onboard the aircraft. If your device offers a ‘flight mode’, this must be enabled prior to boarding an aircraft.

Interference in Cars
Please note that because of possible interference with electronic equipment, some vehicle manufacturers forbid the use of mobile phones in their vehicles unless a hands-free kit with an external antenna is included in the installation.

Explosive Environments

Gas Stations and Explosive Atmospheres
In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your phone or other radio equipment. Areas with potentially explosive atmospheres include fueling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas
Power off your mobile phone or wireless device when in a blasting area or in areas posted power off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.
### Specifications

Handset specifications are shown in the following table.

<table>
<thead>
<tr>
<th>Feature</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating System</td>
<td>Android 4.4 (KitKat)</td>
</tr>
<tr>
<td>Handset Standards</td>
<td>LTE/CDMA</td>
</tr>
<tr>
<td>Dimensions (H × W × D)</td>
<td>6.50” (H) x 3.27” (W) x 0.31” (D)</td>
</tr>
<tr>
<td>Weight</td>
<td>5.99 oz. (with battery)</td>
</tr>
<tr>
<td>Display</td>
<td>6” 720 x 1280</td>
</tr>
<tr>
<td>Camera</td>
<td>8 MP rear camera and 2 MP front camera</td>
</tr>
<tr>
<td>Internal memory</td>
<td>ROM: 16 GB, RAM: 2 GB</td>
</tr>
<tr>
<td>Removable memory card</td>
<td>Supports microSDHC card up to 32 GB</td>
</tr>
<tr>
<td>Battery</td>
<td>3,200 mAh (Non removable)</td>
</tr>
<tr>
<td>Continuous idle time</td>
<td>Up to 10 days</td>
</tr>
<tr>
<td>Continuous talk time</td>
<td>Up to 15 hours</td>
</tr>
<tr>
<td>WAP browser version</td>
<td>WAP 2.0</td>
</tr>
<tr>
<td>Bluetooth</td>
<td>BT 4.0</td>
</tr>
<tr>
<td>HAC</td>
<td>M4/T4</td>
</tr>
</tbody>
</table>

**NOTE:** The phone's talk time and idle time are based on ideal working environments. The use of extended backlighting, browser, and network conditions can reduce battery life and talk/idle time.
